

Your question after the session was a good one - about what is the connection between the modern UFO era beginning in 1947 and the UN vote to make Israel a state the same year on Nov 29, 1947. In the short time we had it probably seemed like it was a leap in logic. (1) According to historical record UFOs seem to have been with us since the beginning of time. Egyptians called them Ra and work of the gods. Sumerians called them Anunnaki. West Africans called them juju. Chinese called them dragons. Much of the world today call them UFO's. (2) Ufologist John Keel who was agnostic recognized a startling fact. That beginning in 1947 with the first modern UFO wave in America we began to be methodically conditioned to interpret the lights in the sky as extraterrestrial visitors. This extraterrestrial hypothesis is a clear break from history. Aliens became a plausible explanation as we began to perfect our rocket science and contemplate going to the moon. Scifi writers also began to pick up on the theme and spread the notion through media. This accords with other historical UFO waves as the phenomenon seems to adjust to psychology and technology of the culture and times in which the sighting takes place. (3) Satan observed the 1947-48 rebirth of Israel as prophetically significant as this began to fulfill Mt. 24 budding fig tree prophecy that heralds the 2nd coming of Christ. (3) The 1947 UFO wave remains a real mystery today with no conventional explanation. I interpret the genuine UFO activity in 1947 as increased demonic reaction to rebirth of Israel, similar to the increased demonic activity during Christ's 1st coming. As we don't know the hour or day of Christ's return, so Satan does not know it either. But since Gen 3:15 he has tried to thwart prophecy throughout history. He also knows his time is short, so he became busier in 1947. (4) Satan is never going to reveal his true self to us, nor are his angels. It is quite telling that neither do the aliens reveal their true origin. When they do say anything it is contradictory and deceptive. When Satan and his billion demons arrive to take over planet earth during the 7 years, they will not do so as fallen angels. They will like they always do have a deep cover story. Did not Satan shapeshift himself into a serpent to tempt Eve? Why didn't he just appear as himself? Because he is more subtle and deceptive than anyone of us could ever imagine. He is the very essence of deception. (5) Beginning in 1947, we have been programmed as a planet to interpret UFOs and their pilots as aliens from a planet that orbits another star somewhere in the cosmos. How do we know the disk and light from the sky and the beings connected with the disk is extraterrestrial? Who told us this? What if there are creatures that could shapeshift into anything your mind could comprehend? Yes, demons can shapeshift into aliens. Why not? It is excellent deep cover and it fits with our modern science, psychology, and worldview. You will never be able to deny they are aliens when you see them darkening the skies one day right after the disappearance of millions of people. The aliens will have the answers for the great problems because they are millions of years advanced over our own technology. Miracle will be explained as advanced tech, not as supernatural. Does the Israel connection make more sense?

Your question: is there no possibility that other creatures live on other planets? God could have created other living beings, but my personal opinion is that if the Bible is a summary statement of everything that is, I would have to say from the biblical record there are only two races: men and angels. If you look carefully at Rev. where everything is wrapped up, different classes of angels are present (including the 24 elders), and human beings are present, but they and the Godhead are all that appears to be there. On the other hand if God had side projects (as Mulder in X-Files said) and failed to mention them to us, then maybe there are others. But again I don't think so. Saying all that I do have to mention that I think perhaps after all is wrapped up and we

are in Eternity with the New Heavens and New Earth, and the New Jerusalem is orbiting earth as the satellite in place of sun and moon, I believe there is a hint that the two races will witness the creation of a third race and perhaps more where the choice of sin is never a possibility for these new creatures. I have imagined that when Satan was called the Star of the Morning before he fell, and he alone was the closest to God, that he saw it written or heard God speak of a third race that would follow in the extreme distant days of tomorrow. Perhaps since Satan is the great imitator, and there is nothing new under the sun, he recalled the memory of the third race, and then planned to pervert it and use it in his master plan to destroy earth and man and ultimately replace God. This he would do by shapeshifting himself into the disguise of the third race and call himself extraterrestrial.

But the real question is not do others live on distant planets. The question is: do UFOs and aliens as they are reported represent those others that live on distant places. I think I can answer that with a confident no. The deep parallels of Alienology with Demonology is too great to ignore. The fact that aliens are creatures of the night. That they present themselves almost exclusively under cover of darkness. That they are dreamlike and more ethereal than physical (Vallee compares them and craft to holograms with mass). That the most characteristic quality about them is that they are Messengers of Deception. (This title for them came again from agnostic Ufologist Jacques Vallee). That they reportedly abduct people against their will in the middle of the night. That they do heinous sexual acts against men, women and children. That they give nebulous predictions that sometimes come true and sometimes don't. That they give their origins from so many different places in the cosmos that it boggles the mind. That they literally have caused many people to go insane and commit suicide. That there are injuries and deaths related to contact with them. That when they speak theologically it is almost always anti-Christian. That when they speak of Jesus, he is never preminent, the only Son of God, or the only way to God. That whenever they make contact with us, psychic and parapsychical things that have historically been connected with demonology are manifested. Deut. 18 warns against these manifestations, and commands us not to seek them. These things I have listed and much more have been documented, and are reasons never to trust Alienology as currently being experienced. Even agnostics Keel and Vallee (not Christians by a long shot) connect aliens with Demonology. Someone might point to a case here and there where the alien encounter didn't follow the norm presented above. And so doesn't that show there might be some UFO encounters that are real aliens from real ships from real planets? I would caution that Satan quotes scripture (Mat. 4 and Lk. 4) and can appear as good. This is only a device however to further hide and make deeper the lie and the deception. The UFO of light is a device of Satan to mesmerize, hypnotize, and misdirect people. I am an amateur magician of many years. So I know a few card and coin tricks. I know that the magician misdirects the audience to the left hand while in his right hand he is doing the sleight of hand. Satan is a MASTER MAGICIAN that cannot be outdone by the human mind. Our minds are literally clay in his fingers. He will convince the entire world of the lie and the deception coming on the world, and even the elect will be taken in if not for Christ doing battle for us. If the mighty archangel Michael cannot defeat Satan on his own. NO ONE ON EARTH CAN! Except THE ONE! Never underestimate the all power, lying signs and wonders of the evil one.

You spoke also of NDE's or near death experiences. In the early 80's I read Dr. Elizabeth Kubler-Ross and Dr. Moody. Both of these were the leaders in the NDE movement. I felt back then the big overwhelming sense that one was left with when reading the material was that virtually everyone made it to the light, that no fear of death is necessary, and that there is no ultimate judgment. I did a little digging. Both Kubler-Ross and Moody are apparently deep into the occult. Dave Hunt gives some quotes from them, and says Kubler-Ross concludes that death does not exist. He refers to an article about Kubler-Ross. It might be worthwhile to look it up in the Library. The reference is: Jonathan Rosen, "Rewriting the End: Elizabeth Kubler-Ross," in New York Times Magazine, January 22, 1995, p. 22. Based on my research I would say NDE's are a parapsychical manifestation, and part of the demonic network.

Last, speaking of the network I was thinking today while working on a computer at work that when the extradimensional communicates with the 3-dimensional there must be an interface between them. When 2 computers talk to each other you have a wire that connects them and a program that translates between them, so that communication can transfer back and forth. There is a name for this kind of network and it is called the Ethernet. When the extradimensional angel communicates with the 3-dimensional human there must be a network too. The network is called the Parapsychical. When the angel is a fallen angel, there are characteristics of the network of communication. These are the parapsychical and psychic effects such as ESP, psychokinesis, poltergeists etc.
